

President's Message

Greetings to all Members and well wishers.

APCRI was formed 13 years back by a group of doctors working in the field of Rabies prevention. At present many doctors and professionals working in the field of Rabies prevention and control are members of this organization. APCRI members have been associated with landmarks like WHO- APCRI National Rabies Survey, discontinuation of NTV and introduction of CCVs in our country, introduction of IDRV in the country and training of doctors and para-medical personnel in IDRV and PEP.

Sympathy and love towards animals , including dogs, is inbuilt in Indians. It is hoped that the plight of animal bite victims and Rabies patients will be kept in mind before planning and implementing legislations on Animal Welfare.

This year the Annual Conference of our Association, APCRICON 2011 will be held at Chennai on 9th and 10th of July. APCRI members are invited to participate in this Conference and share their experiences and views. The deliberations will help us in moving forward towards the goal of a Rabies free India.

With best wishes,

Date: 31st January, 2011
Place: Hyderabad

Dr.G.Sampath
President, APCRI
