

From the Desk of the Convener of the Editorial Board

Dear Colleagues,

Greetings to all readers of the APCRI Journal. I am very happy to present you with this issue of the APCRI Journal, Volume XIII, issue 1, July, 2011.

The Journal of any professional and scientific organization is the medium through which everyone can get relevant information about the academic and scientific activities of that organization. It is most essential for creating interest about academic and scientific activities in that organization and amongst its members.

The first of the many Aims & Objectives of APCRI is “to bring out regularly a bulletin of the association, which will cover the various scientific aspects of Rabies and will keep us updated regarding newer developments on this fatal disease. It should be the aim of the Editor to maintain a simple yet practical approach in the discussion on various topics”. With this point in mind, **an item called “Special Report” is being presented. In this category, articles/ papers/ publications which are for general distribution among the interested population, and are of very high value scientifically, and are also very authentic are being presented for the benefit of those readers who do not have access to them.** This is a form of social service, because the APCRI Journal is circulated on a purely complementary basis.

I hereby thank all the contributors for their articles. Without an abundant supply of articles, no editor can bring out a journal. I take this opportunity to once again request the scientific community for articles on Rabies and related topics for publishing in the “APCRI Journal”, in future.

I would also like to inform that the Editorial has been written by Dr R L Ichhpujani, Additional Director, NCDC, Delhi. He is the fourth guest editor of the APCRI Journal.

I thank the corporate houses of Novartis, Sanofi Pasteur and Zydus for their Advertisements. I also thank Dr. G.Sampath, President APCRI, Dr. Thomas Mathew, Secretary General, APCRI, and Dr. V. Srinivas Rao, Treasurer APCRI for helping me to bring out this issue of the APCRI Journal.

This issue of the APCRI Journal is a step in the endeavor of the APCRI to fight the menace of Rabies by increasing the awareness about Rabies in all sections of the society. Let us all commit ourselves for the elimination of human rabies from India.

Date: 1st July, 2011
Place: Kolkata

Dr. Amlan Goswami
Convener of the Editorial Board of APCRI
